

# COLON CANCER SCREENING GUIDE

# GET EDUCATED. GET SCREENED.

**Many patients report no symptoms prior to diagnosis, be aware of any changes in your digestive habits. Colorectal cancer symptoms include:**

- Rectal bleeding
- Change in bowel habits
- Blood in your stool
- Abdominal or low back pain
- Unexplained weight loss
- Anemia

**There are many screening tests available for colorectal cancer, including several inexpensive options that can be done in the privacy of your own home. Talk to your doctor about the test that is right for you.**

- Colonoscopy
- Take home stool testing (DNA, FOBT, FIT)
- Virtual Colonoscopy
