ARE YOU 45 OR OLDER?

- NO

DO YOU HAVE A FAMILY HISTORY OF COLON OR RECTAL CANCER, POLYPS, OR ADVANCED ADENOMAS?

- NO

- YES
  - You will likely need screening before 45. Talk to your doctor.

DO YOU KNOW YOUR SCREENING OPTIONS?

- NO

SCREENING OPTIONS:
- Colonoscopy*
- Virtual Colonoscopy
- Take home screening
- Sigmoidoscopy
- Blood Test

*colonoscopy is the preferred screening for those at high risk for colon cancer

- YES

THE SIGNS & SYMPTOMS INCLUDE:
- Change in bowel habits
- Blood in your stool
- Rectal bleeding
- Abdominal pain
- Fatigue
- Unexplained weight loss

American Cancer Society recommends that people with normal risk factors start screening at age 45.

NOW TELL OTHERS TO GET SCREENED.

Great job at looking out for your health!
SCREENING OPTIONS
Talk to your doctor about the best test for you.

AT-HOME STOOL-BASED TESTS
These tests look for blood and/or abnormal cells in your stool. Testing kits are mailed back or returned to your health care provider. If blood or abnormalities are found, a colonoscopy is needed.
- Fecal Immunochemical Test (FIT): every year
- High Sensitivity Fecal Occult Blood Test (FOBT): every year
- Stool DNA test: every 3 years

MEDICAL CENTER
During the visit, your doctor will look at your colon and rectum for polyps or evidence of cancer. Colonoscopies are often considered the gold standard as they may also prevent cancer by removing polyps when they are found. These exams require a full colon cleansing (prep). A blood draw looks for evidence of cancer in your blood and is recommended for average-risk patients who are unable or unwilling to complete a colonoscopy or stool-based test.
- Colonoscopy: every 10 years with normal results*
- Virtual colonoscopy: every 5 years*
- Flexible sigmoidoscopy: every 5 years+
- Blood test**

KNOW THE SIGNS AND SYMPTOMS
- Blood in your stool
- Change in bathroom habits
- Fatigue
- Anemia
- Unexplained weight loss
- Persistent cramps or low back pain
- Feeling bloated
- No symptoms at all

*Your doctor may recommend different timing for visual screening based on your health history and previous results.
+If a polyp or abnormal tissue is found a colonoscopy will be needed to examine the entire colon.
**Talk to your primary care provider and insurance company to decide if it’s right for you. A colonoscopy will be required with abnormal results.

KNOW YOUR RISK FACTORS
A family history of colon cancer or polyps and some medical conditions including Crohn’s disease or ulcerative colitis means you should be screened before 45.

BE AN ADVOCATE FOR YOUR HEALTH
Pay attention to changes in your body and any symptoms you experience. Talk to your doctor. Seek a second opinion if needed.

REDUCE YOUR RISK
